Huay Kwang, Bangkok | (+66) 98-669-8314 | Thapagon.M@gmail.com | <https://www.linkedin.com/in/thapagon-meekaew>

EDUCATION

- B.E. in Industrial Engineering, Chulalongkorn University
2019 - 2022: GPAX 3.46

WORK EXPERIENCE

Full Stack Developer, *Sirisoft public company limited*

August 2023 - Present

- Refreshed the visual design (colors, fonts, images, and graphics) to align with modern aesthetics and updated branding guidelines, ensuring a cohesive and visually appealing user interface.
- Implemented responsive UI for web applications using Angular and Bootstrap, ensuring compatibility across various devices and improving accessibility.
- Developed and maintained reusable components in Angular to streamline development and promote code consistency and maintainability across projects.
- Integrated APIs using Angular and Node.js for real-time data synchronization between the client and server, significantly enhancing the application's responsiveness and performance.
- Designed and implemented database schemas for a trading application using MySQL and Oracle, optimizing data storage and retrieval for better performance.
- Developed and managed CI/CD pipelines using Jenkins, automating the build, test, and deployment processes to accelerate development cycles and improve code quality.
- Utilized Git repositories in Azure DevOps for code management, version control, and collaborative development, ensuring seamless teamwork and efficient code reviews.
- Collaborated with senior management and stakeholders to understand and refine changing requirements, resulting in more efficient project delivery and a reduction in manday usage.
- Enhanced web application efficiency by selecting user-friendly libraries and frameworks that best met client requirements, reducing development time and improving usability.
- Actively participated in Agile development processes, including sprint planning, daily stand-ups, and retrospectives, to ensure timely delivery of features and improvements.

Front-end Developer, *DENSO international asia co. ltd*

Jul 2022 - Dec 2022

- Created a web application for production line loss analysis using Vue.js.
- Implemented lean 6 sigma methodologies to streamline data presentation, reducing analysis time by 30%.
- Collaborated with IoT teams to integrate sensors, achieving a significant reduction in production losses.

SKILL & TOOL

Programming language: HTML, CSS3, SCSS, Javascript, Typescript, Python, Java

Framework: Vue.js, Angular, React (library), Next.js, NestJS

Library: PrimeNG, Angular material, Plotly.js, Apexchart.js (Angular), Tailwind, Bootstrap 5

Databases: MySQL, Oracle

DevOps Skills: CI/CD, Deployment, Docker, Jenkins (or relevant tools)

Tools: Microsoft office (Excel, PowerPoint, Word), Docker, Azure DevOps, Gitlab, Fork, lens, Postman, DBeaver

Language: Thai, English (TOEIC score is 790)
